

BLACK HANDERS KILL MOTHER AND CHILD

Fusillade Shatters Window and Woman and Girl She Holds Fall.

PITTSBURGH, Nov. 14.—Holding her five-year-old daughter, Mrs. Catherine Cardon, forty-two, sat in her home in Page Street, McKees Rocks, late Saturday night when a crash of revolver shots shattered the window near her and she slipped to the floor dead, still clasping the child, who died in the Ohio Valley Hospital yesterday.

Seven bullets entered the mother's body. Two struck the little girl. The murders were committed in revenge for Mrs. Cardon's failure to comply with blackmailing letters demanding \$500.

Neighbors saw two men dash from the shadows of the Cardon residence, leap into a green automobile at the curb, and drove off at top speed. County detectives say the assassins are connected with the Good Killers, whose operations, similar to those of the Black Hand, have stirred terror in other cities.

Pascal Todd, a boarder, was sitting in the same room with Mrs. Cardon, and James Cardon, twenty, a son, was upstairs. Transfixed by terror, Todd had not moved from his chair when James Cardon rushed downstairs.

Mrs. Cardon's husband disappeared mysteriously a year ago, and it is believed he, too, may have been a victim of blackmailers.

Inspector Edward Schwab, who, with Inspector Collis and Supt. Kieley of the Grand Central Post Office Branch, was assigned to reorganize the Department of Mails upon the suspension of Earl E. Norris, following the recent \$200,000 mail robbery at Broadway and Leonard Street, announced yesterday that 201 marines had arrived from Quantico, Va., and had reported for guard duty to Postmaster Morgan.

The total force now is four officers and 201 men. The sixty-four marines on duty since last Friday were given twenty-four hours off yesterday. About seventy-five men will be quartered in the General Post-Office Building each night and the rest will be housed in the Naval Y. M. C. A., Brooklyn.

Marines doing platform guard duty will work in shifts of four hours on and eight hours off. Those assigned to mail wagons will work eight straight hours. The four armored trucks will be ready for use this week.

MICHELSON TESTS EINSTEIN THEORY

Scientist Develops Mechanism for Accuracy Measurement of Light Velocity.

CHICAGO, Nov. 14.—Experiments by which it is hoped to test the accuracy of the Einstein theory were described in a paper prepared by Prof. Albert A. Michelson of the University of Chicago to be read today before the National Academy of Sciences.

The apparatus developed by Prof. Michelson consists of a mechanism for the most accurate measurement of the velocity of light which he says he hopes to have perfected by next summer so that the exact speed may be measured within two miles per second.

"More accurate light measurements would certainly aid us in gaining a more accurate knowledge of the stellar universe," he said. "It might also be of aid to artillery officers, especially the coast artillery, in the preparation of firing data."
